

Santa Fe HO Scale Craftsman Style Freight Car Kits

Revised July 2011

This list is for reference only. It contains mostly craftsman style resin freight car, waycar and work car kits in HO scale. It also contains a small number of kits made from other materials like injection molded plastic, laser cut wood or a mixture of the above which feature a similar levels of quality and detailing as current resin kits.

Old style white metal, wood and stamped metal kits as well as pre-painted shake-in-the-box type plastic kits are not included. Kits are unpainted and contain all parts except trucks and couplers unless noted otherwise.

Corrections, suggestions and additions are most welcome. Please contact me by email: [peteraue\(at\)yahoo.de](mailto:peteraue(at)yahoo.de)

MAN	KIT #	TYPE	CLASS	DESCRIPTION	\$\$	INTRO DATE	AVAILABILITY
